For the convenience of the Examiner and to comply with 37 CFR 1.56, 2.97 and 1.98, the following are patents containing information which the Examiner may consider important in the examination of this application.

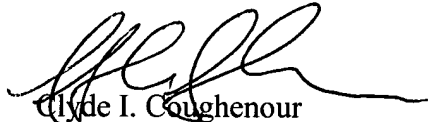

Attached are copies of the patents that may be of interest. Most of them are cited in the specification. None of these references teach the liquid applicator valve with elastic closure cap having a valve neck with an enlarged sealing ring that secures into a similar shaped stopper recess and an elastic closure cap provided with tines.

These patents, more specifically defined in the Form PTO-1449 attached, are:
